*A*FTER MANY MONTHS of study and preparatory work, we are able to offer herewith the first complete and standardized line of hand-wrought iron Colonial Builders Hardware.

Following authentic Colonial designs, every piece in this collection has been planned to meet building conditions as they exist to-day. The specifications have been studied so that they correspond with building practice generally in use.

Only by standardization, modern factory methods and quantity production, are we enabled to offer hardware skillfully wrought by hand with all the beauty of the best examples of Colonial forge work, at prices hitherto unknown in this field; and we cannot therefore accept for execution, orders for special hardware other than specified here.

Every item is packed complete with hand-wrought hammered head screws and is inspected at the factory and ready for use.
